**Others in the region:**

Catchall Environmental <https://www.catchallemvironmental.com/> Port Orchard or Tacoma

*Note 1* We assisted a company in sweeping permeable pavement and removed sediment from them with our vac

*Note 2* Private dewatering station

*Note 3* As long as it's sand, gravel, mud, yard debris then we take to a site we own. If it has an oil spill or heavy sludge then we don't do it; bring the big boys in from out of town. We don't do testing.
